

SUPHACHAI CHAICHANG

UX/UI Designer | Product Designer | Website Designer

· suphachai.chaichang@gmail.com · 098-4480268

PROFESSIONAL SUMMARY

UX/UI Designer with experience delivering end-to-end design for complex web applications and ERP systems. Skilled in turning ambiguous problems into intuitive, user-tested interfaces using Figma and Framer. Integrate AI tools such as Claude into daily workflow to accelerate research, ideation, and delivery.

PROFESSIONAL EXPERIENCE

Infopro Business Solution ----- **June 2024 - Present**

University ERP System - My Success Story (Website , Web Application)

- Redesigned complex university workflows resulting in a more intuitive user experience and reduced task completion time.
- Conduct user testing to gather feedback and improve the design to align with user needs.
- Discussing and making decisions with the dev team during the coding phase.

School ERP System - Ace Student/Teacher (Website , Web Application)

- Design wireframes, prototypes, and mockups for a web app that is usable on both desktop and mobile devices.
- Test the system's usability and improve the workflow to enhance the user experience
- Provide support when users encounter issues during usage.

Currency Exchange System - Linda Exchange (Website)

- Conducted user interviews to uncover friction points and define design opportunities aligned with business goals.
- Built and maintained a Design System that enforced brand consistency across all touchpoints and accelerated design-to-handoff workflow.

Business Management ERP System - Workwell (Website , Web Application)

- backend UI redesign, focusing on improving information hierarchy and reducing cognitive load for daily users
- Optimized system workflows by mapping user mental models to interface structure, making complex operations more intuitive.
